

The TRUTH:

“Accredited” vs. “Non-accredited”

FAQ's:

Is it possible to obtain accreditation before you have graduates from a program? If it is not possible, at what point do the graduates become eligible to sit for the registry?

ANSWER: Yes, it is possible to obtain accreditation prior to graduating a class. Typically, a program that does this will be asked to send outcomes to the JRC-DMS each year in the form of progress or annual reports. Accreditation is generally recommended for a shorter time period than the usual maximum, pending outcome information for the graduating classes. If the program is accredited anytime during an academic year, even just before the class graduates, the class can sit for the ARDMS exams under the prerequisite that states graduate of an accredited program. Otherwise the class would have to apply under one of the other prerequisites named by the ARDMS.
